## Roadworks Scheme 2022

Tim Butler
Director of Services

#### **ROADWORKS SCHEME 2022**

#### CONTENTS

- Report by Director of Services
- Roadworks Scheme 2022 Appendices

#### **DIRECTOR OF SERVICES**

#### REPORT ON

#### **ROADWORKS SCHEME, 2022**

#### 1. INTRODUCTION

- 1.1. The 2022 Roadworks Scheme was prepared to make best use of resources and maximise the number of projects that will be completed to protect and improve infrastructure and improve safety and mobility in County Kilkenny. The key targets are:
  - the need to protect and maintain existing road assets;
  - the continuous need for improvements to bring the road network up to an acceptable standard;
  - a requirement for all roads projects to be identified, managed and reported through the DTTAS Pavement Management System;
  - an increasing inventory of public lights, and a commitment to upgrade the lights to LED.
  - compliance criteria set out in the Transport Infrastructure Ireland and Department of Transport Memorandum on Roads Grants;
  - the requirement to maintain roadside drainage systems to a satisfactory operational standard;
  - the increasing length of the public road network throughout County Kilkenny as estates are taken in charge etc.;
  - Improve road safety and mobility for everyone.

#### **Funding Streams**

#### Transport Infrastructure Ireland (TII)

2022 Transport Infrastructure Ireland Grants for National Road Improvement and Maintenance total €6,848,397. This includes for pavement improvement on the N77 and a scheme on the N78 which will be undertaken later this year:

There are also 7 no schemes on National Roads that received TII funding to be further advanced in 2022. The schemes are:

- N24 Tower Road Junction Improvement Scheme
- N24 Carrick Road Improvement Scheme
- N10 Dundaryark to Danesfort
- N77 Ballyragget Village to Ballynaslee Improvement Scheme
- N77 Georges Tree to Dunmore West
- N78 Webbsborough Pavement Scheme
- N24 Waterford to Cahir

## 2022 Department of Transport

2022 Department of Transport grants for the Non-National Road Network total €16,981,877 as compared to €16,795,195 in 2021.

The key targets areas for improvement are Restoration Improvement and Restoration Maintenance. They make up 68% of the total allocation.

- The DTTAS Memorandum on Road Grants for Regional and Local 1.2 Roads provides information on and defines the conditions governing the payment of grants to local authorities in respect of improvement and maintenance works on roads. It also includes conditions the chargeability against state grants of expenditure incurred on such works. The percentage is based on the direct labour payments and therefore no overheads may be apportioned against design, consultant contractor payments, holiday pay, sick pay or site allowances agreed nationally. The wages of the outdoor staff on some schemes will be levied by 38.5% towards the cost of EL, PL and Holiday Pay and will have to be paid by Kilkenny County Council own Resources.
- 1.3 Due to ongoing requirements in relation to best practice in Health, Safety and Welfare at Work and Staff Training, a provision of €103,000 has been allocated for these purposes.
- 1.4 A Reserve Fund of €145,000 has been allocated for unforeseen circumstances including severe weather and unforeseen costs associated with the management of the road network throughout County Kilkenny.

# 2.0 ROAD SCHEDULE, MAPROAD, PAVEMENT MANAGEMENT SYSTEM

2.1 The public road network for County Kilkenny is summarised in

Table 1 below;

Road Category	kms
Motorway	70.27
National Primary	63.7
National Secondary	68.28
Regional	434.09
Local	2696.32
Total Network	3332.66

Table 2 Road Category by Municipal District Area

Road Classification		Municipal Districts			
	Castlecomer MD	Call/Thom MD	Kilkenny MD	Piltown MD	Totals
	(kms)	(kms)	(kms)	(kms)	(kms)
	(%)	(%)	(%)	(%)	(%)
Motorway (M)	20.78	28.59	0	20.9	70.27
500 890 90	29.57%	40.69%	0.00%	29.74%	100.00%
National Primary	2.11	9.49	6.91	45.19	63.7
	3.31%	14.90%	10.85%	70.94%	100.00%

Local Tertiary (LT)	171.51	161.49	48.3	109.07	490.37
	34.98%	32.93%	9.85%	22.24%	100.00%
Totals (kms)	1,175.99	1,175.80	188.91	791.96	3,332.66
\$250 HTS	35.29%	35.28%	5.67%	23.76%	100.00%

#### 2.2 Map Road/Pavement Management System

From 2015 all DTTAS grant allocations are governed by a Pavement Surface Evaluation and Rating System. This provides for a consistent approach to the evaluation of pavement condition across the state. In turn the pavement evaluation and rating system enables the prioritisation of schemes for inclusion in works programmes etc.

Such evaluation and rating systems form part of an overall road management system that will include for maintenance of the road schedule, project details, bridge management data, road opening licences and administration of state grants associated with the maintenance and improvement of the road asset.

In terms of the Pavement Surface Evaluation and Rating System, below is a brief description on how we rate the roads.

Ratings can be described as follows;

#### Rating 1 – 4

 Road Conditions are ranging from poor to very poor and road needs reconstruction (circa €28 to €32 per sq m).

#### Rating 5 - 6

 Road Conditions reasonable with only localised repairs and routine maintenance required (up to €7 per sq m).

#### Rating 7-10

 Road Conditions good to excellent with only routine maintenance required.

#### 3. IMPROVEMENT GRANTS ON NATIONAL ROADS

#### 3.1 Trends:-

The following Table compares the 2022 allocations for improvement works on national roads in County Kilkenny with those in previous years: -

Table 3 National Roads Funding Trends:

11/11/2		Major	Total
Year	Maintenance Grants		Allocation
2000	€1,131,570	€14,478,000	€15,609,570
2001	€1,682,750	€17,155,160	€18,837,910
2002	€1,539,000	€9,527,066	€11,066,066
2003	€1,975,200	€13,567,770	€15,542,970
2004	€1,767,300	€11,160,750	€12,928,050
2005	€1,811,832	€26,145,000	€27,956,832
2006	€1,841,916	€87,290,000	€89,131,916
2007	€1,800,784	€173,538,784	€175,338,784
2008	€1,899,871	€242,298,000	€244,197,871
2009	€1,468,046	€199,688,000	€201,156,046
2010	€1,409,700	€79,424,461	€80,834,151
2011	€1,143,066	€12,453,673	€13,596,739
2012	€952,652	€6,857,800	€7,810,452
2013	€773,695	€914,755	€1,688,450
2014	€636,391	€924,600	€1,560,991
2015	€641,946	€6,129,197	€6,771,143
2016	€654,873	€5,634,197	€6,289,070
2017	€533,852	€6,459,200	€6,993,052
2018	€593,852	€5,310,000	€5,930,332
2019	€624,087	€5,705,000	€6,329,087
2020	€636,503	€10,790,000	€11,426,503
2021	€636,503	€7,635,000	€8,271,503
2022	€616,634	€6,231,763	€6,848,397
		Total Over Period	€976,115,885

#### 3.3 National Road Maintenance Allocations

€616,634

Maintenance allocations provide for the day to day maintenance requirements of the National Road Network throughout County Kilkenny. The allocations fund the provision of winter maintenance (salting), the costs associated with traffic route lighting and normal repairs to the road surface, drainage infrastructure, safety barriers and signage.

National routes throughout County Kilkenny are the subject of monthly maintenance inspections whereby maintenance requirements are identified and prioritised by way of a new NRA Geo Application.

#### 3.4 Motorway Maintenance

Members are advised that since June 2013, the provision of all road maintenance services on the motorway network (including winter maintenance) is provided by contractors Egis Lagan Services in County Kilkenny subject to the provisions of a Motorway Maintenance and Renewals Contract.

#### 4.0 GRANTS FOR NON-NATIONAL ROADS

#### 4.1 Trends

The following Table compares the 2022 allocations for maintenance and improvement works on non-national roads in County Kilkenny with those in previous years: -

Table 4: Non National Road Allocations 2000-2022

Year	Own Resources	DTTS Allocation	Total Allocation
2000	€ 1,690,650	€ 7,970,145	€ 9,660,795
2001	€ 1,689,900	€ 9,183,380	€ 10,873,280
2002	€ 1,816,868	€ 10,535,698	€ 12,352,566
2003	€ 2,030,000	€ 10,404,000	€ 12,434,000
2004	€ 2,330,000	€ 10,459,000	€ 12,789,000
2005	€ 2,415,000	€ 10,864,500	€ 13,279,500
2006	€ 2,615,000	€ 12,920,500	€ 15,535,500
2007	€ 2,853,000	€ 14,476,900	€ 17,291,900
2008	€ 2,714,900	€ 14,775,764	€ 17,590,664
2009	€2,303,100	€11,373,699	€13,676,799
2010	€1,836,000	€10,490,699	€12,326,699
2011	€1,721,000	€ 9,871,745	€11,592,745
2012	€1,590,600	€9,898,343	€11,488,943
2013	€1,400,000	€9,958,007	€11,358,007
2014	€1,613,000	€9,238,000	€10,851,000
2015	€1,956,099	€8,876,788	€10,832,887
2016	€1,983,000	€8,931,601	€10,914,601
2017	€1,700,000	€9,724,107	€11,424,107
2018	€1,771,000	€11,972,000	€13,743,000
2019	€1,611,000	€12,678,250	€14,449,250
2020	€1,601,000	€14,948,195	€16,549,195
2021	€1,611,000	€16,795,195	€18,406,195
2022	€1,611,000	€16,981,877	€18,592,877
		Total Over Period	€308,013,510

Table 5 hereunder summarises the detail of the 2022 DTTS grant allocation and compares it with the 2021 allocations:-

Table 5:

Category	2021	2022	% Difference
Restoration Improvement Grant	€8,328,000	€9,032,500	+8%
Restoration Maintenance Grant	€1,393,500	€1,393,500	-
Supplementary Maintenance Grant	€995,500	€1,095,000	+10%
Discretionary Grant	€2,652,500	€2,642,000	-0.4%
Bridge Rehabilitation Grant	€200,000	€247,000	+23.5%
Safety Improvements works	€373,000	€397,400	+.014%
Training Grant	€66,500	€66,500	
Speed Limits	_	€40,040	+100%
Cycle Sign		€11,750	+100%
Former National roads	€400,000	€250,000	-37.5%
Climate Adaptation & Resilience Works	€212,000	€567,000	+167%
PSCI Surveys	€25,000	€25,000	
Drainage works	€652,195	€652,195	-
CIR Scheme	€639,500	€537,900	-16%

## 4.2 Restoration Improvement and Restoration Maintenance

Restoration Grants continue to provide the main focus of the regional and local roads programme. The Improvement Grant allocation will be largely based on the 3-year works programme submitted by local authorities to the DTTAS in 2021. Flexibility is afforded to local authorities to re-prioritise improvement schemes and these are agreed at Municipal District level.

To note local authorities can no longer transfer up to 19% of Restoration Improvement grant allocations to the more maintenance related Discretionary grant category. This reduces the council's capacity to undertake important improvements works such as the upgrade of footpaths.

The Restoration Maintenance and new supplementary maintenance grant provides funds for surface dressing works (tar and chips) which provides for a restoration of skid resistance, and resealing of the road surface thereby preventing the ingress of water to the foundation layers.

### 4.3 Local and Regional Roads Maintenance

Local and Regional Roads Maintenance is funded from the Council's own resources. The allocation is in line with previous years and is very essential funding for the daily repairs of roads and footpaths.

#### 4.4 Bridge Rehabilitation Works Grant

€247,000

Bridge Rehabilitation works, following on from Principal Inspections of the Council's Bridge Stock in recent years, 13 no bridges have been identified for works in 2021. A full list of the bridges is available in the DTTAS circular in appendix II at the back of the report.

#### 4.5 Low Cost Safety Improvement Grants

€397,400

This Grant is targeted at the introduction of low cost safety measures on sections of the road network which, it is deemed, present hazards for road users. The total grant available in 2022 is €397,400 for 19 no schemes. A full list of the schemes is available in the DTTAS circular in appendix II at the back of the report.

## 4.6 Community Involvement in Roadwork's (CIR) Scheme €537,900

This Scheme is targeted at the Local Tertiary Road Network (cul-de-sac) on which there are small volumes of traffic and where traffic is largely associated with local residences and local businesses. Each Municipal district will have a priority list for consideration.

#### 4.7 Local Improvement Schemes

€390,790

An allocation of €390,790 for 2022 has been received to date. This grant scheme facilitates the completion of works on non-public accommodation roads and on private lanes. The principles of the Scheme are similar to the Community Involvement in Roadworks Scheme. However, the applicants have a lower % contribution to make.

This is a source of funding to upgrade sections of former National roads. This fund is very welcome as these roads still carry significant volumes of traffic and have substantial carriageway widths which lead to additional costs for overlay from the road restoration funding.

#### 4.9 Climate Change Adaptation & Resilience Works

€567,000

The allocation in 2022 is to deal with the impact climate change is having on our regional and local road network. The main projects include but are not limited to the following:

- Preventative measures such as drainage works to mitigate road flooding
- Works at bridges to take account of increased hydraulic loads due to flash floods or other climatic events.

The total grant available in 2022 is €567,000 for 24 no. schemes. A full list of the schemes is available in the DTTAS circular in appendix II at the back of the report.

#### 4.10 Drainage Works

€652,195

This scheme was introduced in 2018 for drainage measures. Significant benefits from this scheme have been seen already in protecting roads and vulnerable areas. The funding may be used for the alleviation of road drainage problems either through new works or remedial works.

#### 4.11 Flood Repairs and Flood Preventative Measures

The OPW has committed € 1bn to a 10 year programme for the implementation of 118 flood schemes nationally and €29m for Kilkenny for the following schemes

- Ballyhale
- Freshford
- Graiguenamanagh
- Inistioge
- Piltown
- Thomastown

Two Engineering staff are currently working on tranche 1 projects Graignamanagh and Ballyhale. The projects will be implemented over the next 10 years.

#### 5.0 PUBLIC LIGHTING

Kilkenny County Council retains responsibility for day to day maintenance and energy supply for in excess of 11,000 public lights. A sum of €1,164,000 has been set aside to fund the management of the public lighting network in 2022. This will cover the maintenance and payback of energy upgrade works over the last number of years.

#### 6.0 ROAD SAFETY

Road Safety plays a key role in our annual roadworks scheme. We have come to the end of our current Road Safety Plan covering the period 2015 to 2020 by the Infrastructure, Transportation and Water Strategic Policy Committee. A new plan for the next 10 years will be developed through the SPC in 2022. The plan will identify defined projects and actions across the core areas of intervention namely, Engineering, Education, Enforcement and Engagement.

#### 7. CONCLUSIONS

- **7.1** Whilst the 2022 Roadworks Scheme largely concentrates on the maintenance of the road assets there will also be significant enhancements to both National and Non-National Routes and to public realm in villages and towns.
- **7.2** The issue of Road Safety is a key component of any Roadworks Scheme. The Scheme elements agreed at Municipal District level play a key role in supporting the safety characteristics of the road network and complement and support the measures to be set out in the County Kilkenny Road Safety Plan.
- 7.3 The attached Roadworks Scheme distributes the funds available in the most effective manner possible, having regard to:
  - the current condition of the road network,
  - the priorities set out in the 3 year road restoration programme,
  - the conditions attached to various grant categories,
  - · the approval by the Members at the recent Municipal District Meetings,
  - the requirements of road safety and Health and Safety at Work legislation, and

I therefore recommend that the Council approve the Scheme.

Appendix I...... T.I.I Funding for National Roads

## 2022 Grant Allocations to Local Authorities for National Roads, Active Travel and Greenways

Kilkenny County Council

## 2022 Grant Allocations to Local Authorities for National Roads and Greenways

#### 1.0 Introduction

1.1 National Roads and Greenways Allocations and the NDP
This note is being provided to explain the considerations required in finalising "The 2022 Grant
Allocations to Local Authorities for National Roads" (the "Allocations"). The Allocations were made
having regard to the priorities set out in the National Development Plan 2021-2030, other national
policies, and the views of the Minister of Transport.

The compilation of the Allocations was happening at the same time the Government published, the National Development Plan 2021-2030 (NDP) on 4 October 2021 – which was a revision of the previous NDP 2018-2027. Therefore, the Allocations are in line with the new NDP 2021-2030 and is in the context of the Exchequer Capital Allocations being made available for national roads.

Additionally, pursuant to a request from the Minister for Transport, Transport Infrastructure Ireland became the Approving Authority for Greenways as of 20 September 2021 (a role previously performed by the Department of Transport). Accordingly, a separate allocation is being provided by DoT for funding Greenways.

DoT have advised TII that the Exchequer Capital Allocation for national roads for 2022 will be €581 million. DoT is also providing a separate allocation for Greenways (Capital) of approximately €60 million and an allocation for national roads maintenance (Current Expenditure) of €34.85 million. The amount of the Exchequer Capital Allocation for 2022 is a key factor in determining the timing of delivery of national roads programmes, projects and operations.

The Roads Act 1993, states that it shall be a general duty of Transport Infrastructure Ireland (TII) to secure the provision of a safe and efficient network of national roads. Section 19 (2) of the Roads Act 1993 sets out that TII shall, as far as possible, arrange that its functions (including prepare, or arrange for the preparation of, design for construction or improvement works or securing the carrying out of construction works) shall be performed on its behalf by the relevant road authority (i.e., the relevant Local Authority). Therefore, TII provides allocations to Local Authorities on an annual basis, so they can deliver on the functions of TII in relation to national roads. If for any reason it is not possible to deliver on a particular project or for TII to approve the progression of a project, TII can, and does, reallocate part or all the relevant funding to other national roads projects during the year.

## 1.3 Key Points to Note

Key points to note from this note are:

- The Exchequer allocations are confined by the funding voted by the Oireachtas and distributed by the Department of Transport (DoT).
- The funding provided to TII is for the purpose of fulfilling TII's statutory duties and delivering Government policy in connection with national roads.

- The allocations are an indication of the progress that TII believes is possible on each national roads project, programme, or operation during 2022 and will be used to reimburse the relevant Local Authorities for costs incurred in accordance with chargeability requirements.
- If the progression of any national roads project, programme or operation is impeded or
  priorities change, the funding will be redistributed by TII, in accordance with its statutory
  remit, to other national roads projects, programmes, or operations.

## 2.0 NDP Funding

The NDP considers the 10-year period of the NDP in two periods of five years, namely, 2021-2025 and 2026-2030. As stated in the NDP, the final funding for 2026-2030 will be determined in a new NDP for the period 2026-2035, following a review of the NDP by Government in 2025.

The NDP does not specify the funding resources to be made available to TII for national roads and Greenways. While the aggregate indicative allocations for the two 5-year periods have been provided by DoT, the total Exchequer allocation for national roads in any one year over the term of the NDP will be decided by DoT on an annual basis.

The Board of TII, in approving the Allocations for 2022, decided to progress the planning and design for more bypass projects with a view to facilitating the compact growth objective in the NDP and contained in the Government's forthcoming "Town Centre First policy", in alignment with the Minister's views that increasing focus should be on providing bypasses.

DoT notified TII that approximately €2,400 million is intended to be allocated by DoT to TII over the period 2021-2025 as follows:

- Protection and Renewal: approximately €1,300 million, and
- New Roads: approximately €1,100 million.

Furthermore, DoT notified TII that approximately €5,600 million is intended to be allocated by DoT to TII over the period 2026-2030 as follows:

- Protection and Renewal: approximately €1,600 million, and
- New Roads: approximately €4,000 million.

All amounts above are indicative. An additional separate allocation for Greenways is provided by DoT to TII. The funding resources to be made available to TII for New Roads is mostly available within the 2026-2030 period, which impacts the timescale for delivery of Major Projects.

Please note that Protection and Renewal includes asset management to maintain the national roads network in an acceptable steady-state condition, which includes the pavement asset renewal programme, minor safety improvement projects, the safety programme, operations and maintenance of motorways and tunnels, intelligent transport systems (ITS), active travel, bus priority improvements, as well as the operation of the M50 managed motorway EMOS system of variable speed limits and incident management.

#### 3.0 NDP Priorities for National Roads

There is a need to balance available funding across the national roads programmes, projects and operations having regard to the NDP. The rate of progress on the delivery of Major Projects is dependent on the availability of funding resources on a multi-annual basis.

The constraints on the funding for 2021-2025 means several projects named in the NDP will be progressed during the period 2026-2030 or post-2030, in line with the projected increased funding expected to be available in the 2026-2030.

In summary, the Allocations seek to achieve the following key outcomes in accordance with the NDP priorities for national roads:

- <u>Protection and Renewal</u>: Maximise allocation of funding resources, as close to adequate levels as possible, to Protection and Renewal programmes, projects and operations. Road safety schemes and minor safety improvements projects are part of Protection and Renewal.
   Additionally, allocate funding to improvements that provide for bus priority measures.
- Major Projects in/near Construction: Allocate sufficient funding resource to Major Projects in construction or commencing construction to meet contractual payment obligations.
- N/M20 Cork to Limerick: Allocate sufficient funding to continue planning and design of the N/M20 Cork to Limerick project with a view to achieving approval of its business case and making the application for its planning consent and land acquisition orders in the period 2021-2025. Commencement of main works construction, subject to approvals, expected to commence in the 2026-2030 period of the NDP. Completion of project expected to be post-2030.
- Connectivity of Ports Roads with Planning Consent: Allocate sufficient funding to acquire
  land and progress advance works contracts for the N28 Cork to Ringaskiddy (planning
  consent confirmed March 2021) and the N21/N69 Limerick to Adare/Foynes (planning
  consent expected in 2022). Commencement of main works construction of the N28 and
  N21/N69 projects, subject to approvals, expected to commence in the 2026-2030 period of
  the NDP.
- Connectivity of Ports Roads in Planning: Allocate sufficient funding to continue planning
  and design of the N11/N25 Oilgate to Rosslare project with a view to achieving approval of
  its business case and making the application for its planning consent and land acquisition
  orders in the period 2021-2025. Commencement of main works construction, subject to
  approvals, expected to commence in the 2026-2030 period of the NDP.
- Bypasses / Ring-Roads with Planning Consent: Allocate sufficient funding to progress advance works contracts for the N6 Galway Ring Road (planning consent was received from An Bord Pleanála on 8 December). This is prior to a Government decision on whether the project will proceed to construction.
- Bypasses in Planning: Allocate available funding, after meeting other priorities above, to
  continue planning and design of Major Projects that provide town or village bypasses with a
  view to supporting Compact Growth and Town Centre First objectives. Progression of
  individual projects into the planning consent process will be subject to approvals. A
  restricted number of projects are expected to commence main works construction, subject
  to approvals, in the 2026-2030 period of the NDP. Remaining projects are expected to
  continue progression through planning and/or commence main works construction, subject
  to approvals, post-2030.
- Other Major Projects in Planning: Allocate available funding, after meeting other priorities
  above, to other named Major Projects on the NDP list of national roads projects in planning
  (NDP, Chapter 7, page 64). Also make provision for funding suspension payments
  contractually due pursuant to technical adviser contracts for projects in the planning and
  design stage that are required to be suspended over the 2021-2025 period because of
  insufficient funding resource to progress planning. Consider on a case-by-case potential to

- restart planning of such projects in the 2021-2030 period should funding resource become available.
- Other Major Projects: Consider allocating any other additional funding made available to TII, after meeting other priorities above, to other Major Projects proposed by TII or Local Authorities on a case-by-case basis.

#### 4.0 The Allocations

In accordance with the Roads Act 1993, it is the general duty of TII to secure the provision of a safe and efficient network of national roads and for that purpose TII has overall responsibility for the planning and supervision of works for the construction and maintenance of national roads. Pursuant to its statutory duty, TII is allocating the Exchequer Capital Allocation for 2022 to Local Authorities as set out in the Allocations.

For each Local Authority the allocation is made under two main headings:

- Improvement: Allocated to specific projects, programmes, and/or operations.
- Maintenance: Separate allocations for national primary and national secondary routes, and further sub-divided across ordinary maintenance, route lighting, and winter maintenance.

In keeping with current practice and procedures, TII and Local Authorities will continue to monitor progress on the planning, design and delivery of programmes, projects and operations set out in the Allocations through established Management Advisory Committees and related reporting and management processes.

National Roads				2			

## An Roinn Iompair Department of Transport

#### CIRCULAR RW 02/2022

#### 2022 REGIONAL AND LOCAL ROAD GRANT ALLOCATIONS

#### Dear Director of Service.

- I am directed by the Minister for Transport to enclose details of the 2022 grant allocations
  to your authority in respect of the maintenance and improvement of regional and local
  roads. The total grant allocation in 2022 under this Circular is €597million. The amounts
  available nationally under the various grant headings are set out in Appendix 1 and
  individual local authority allocations and scheme details are set out in Appendix 3.
- 2. The conditions applying to the payment of allocations under the various grant categories are set out in the Memorandum on Grants for Regional and Local Roads. The last revision of the Memorandum came into effect in March 2021 (RW 04/2021).

A revised Memorandum on Grants for Regional and Local Roads will be issued to local authorities by Circular in the coming weeks.

In the context of the substantial Exchequer grant support being provided to local authorities, the Minister again wishes to emphasise to Councils the importance of road maintenance and improvement works which promote the safety of all road users, including cyclists and pedestrians. Measures, including appropriate road pavement edge treatment, maintenance of verges, embankments and cuttings, roadside drains together with repairs of road pavement, footways, cycle tracks and cycleways, can all contribute to road safety and are eligible for grant assistance.

- 3. The Department wishes to draw local authorities' attention to the requirements of the Traffic Signs Manual in respect of regulatory signs. While these requirements reflect the necessity to inform motorists that particular restrictions or prohibitions exist, local authorities should ensure that signage is installed without creating a hazard and that reasonable safe access and accessibility is provided for all. In this regard section 1.3 of Chapter 1 of the Traffic Signs Manual (<a href="www.trafficsigns.ie">www.trafficsigns.ie</a>) provides extensive detail on the 'Siting' and 'Placement' of signs and, in particular, 1.3.43 sets out measures which should be considered to avoid street clutter.
- Local authorities must ensure that all works undertaken on foot of State grants are completed in accordance with the applicable conditions by the various intermediate and completion dates set out in Appendix 2.
- Output returns for individual grant programmes will be required after the final grant payments for the year are made.
- In addition, local authorities should vigorously pursue outstanding invoices from contractors during the year to ensure the timely claiming of grants in 2022. Local authorities should claim eligible payments as soon as possible and should not wait until the end of the year to do so.

 Progress on all grant-aided works will be reviewed regularly and grants will be reallocated where a shortfall in expenditure is expected. Such adjustments may entail the distribution of the sum involved to another local authority.

#### MapRoad - Pavement Management System (PMS)

8. All Local Authorities are reminded that they must upload and maintain full records of all pavement projects on the PMS. All projects for RI and RM/SRM will continue to be submitted and managed through PMS. Any pavement interventions across other grant categories (for any Government Department or Agency) or using own resources must also be uploaded to the PMS.

As you are aware, the Department has now moved from a paper/email-based Form A / Form B return to an online system through the PMS. It is, therefore, essential that each LA maintains records of all pavement works on the PMS system.

 Section 10 (5) of the Roads Act 1993 requires that each Road Authority maintain a schedule and map of all public roads for which it has responsibility. Each Local Authority is required to keep this schedule up to date on PMS. The payment of grants is linked to this requirement.

#### Restoration Improvement Programme (RI)

- 10. The RI Programme continues to be the main focus of the regional and local roads programme. An overall amount of €282 million will be provided under the 2022 Restoration Improvement Grant.
- 11. Circular RW 11/2021 requested Councils to submit a multi-year RI programme for 2022, 2023 and 2024 based on a budget estimate of 100% of your Council's initial 2021 RI grant allocation. The Circular specified that the programme should be submitted on PMS. Based on the allocation under this Circular, Councils should now submit an updated RI programme for 2022 by the 15th March 2022 on PMS.
- 12. Should the Council wish to change its RI programme during the year it should advise the relevant Department Inspector by email and copy the email to <a href="RLR@transport.gov.ie">RLR@transport.gov.ie</a>. A list of inspectors as currently assigned to different councils is given in **Appendix 4**.

#### Restoration Maintenance Programme (RM) & (SRM)

- 13. The Restoration Maintenance (RM) Programme continues to be an important programme aimed at protecting road surfaces.
- 14. Given continuing constraints in relation to current funding for the RM programme, the provision of a Supplementary Restoration Maintenance (SRM) Grant using capital funding is being continued in 2022. An overall amount of €75 million will be provided under the RM and SRM programmes in 2022.
- 15. Both the RM and SRM Grants may only be used for Surface Dressing works. If sealing works, other than surface dressing, are required, then they should be included under the RI or Discretionary Grant programmes.

This means that works such as slurry sealing, clause 942 material, wearing course macadam and HRA which are often used in urban areas may now be only carried out under the RI or Discretionary Grant programmes.

- Councils should record both their 2022 RM and SRM works under the Restoration Maintenance programme on PMS by the 15<sup>th</sup> March 2022.
- 17. Councils should plan their programmes to ensure that all their RM grant funding is drawn down first before claiming against the SRM grant.

#### Discretionary Grant (DG)

- 18. Discretionary Grants (DG) amounting to €84 million approx. will be available to meet the cost of road maintenance and improvement works selected by local authorities pursuant to relevant Departmental Circulars.
- 19. The cost of salt used by local authorities in the winter period of 2020/2021 has been deducted from each authority's Discretionary Grant. Local authorities can use Discretionary grant monies towards staff or plant costs associated with salting operations or for the purchase of salt.
- 20. Councils are required to submit details of their proposed 2022 DG Programme on the excel sheet attached in Appendix 5. This return should be submitted to the Department at RLR@transport.gov.ie by the 15<sup>th</sup> March 2022.

#### Community Involvement Scheme (CIS)

- 21. Ring-fenced funding for the Community Involvement Scheme was introduced in 2018. Since then, funding has been allocated for 2-year periods with a view to giving local authorities more flexibility in delivering this programme.
- 22. Following a further application process in 2021 the same approach is being taken for the current tranche of CIS funding with funding allocated for a two-year period covering 2022 and 2023. The allocation for your local authority for 2022 is set out in Appendix 3. Where the overall amount sought by a local authority exceeds the allocation, the local authority will have to prioritise the projects to be funded. The final programme should then be submitted on MapRoad. Councils will be advised separately of indicative 2023 CIS allocations.
- 23. Grants allocated under other Departmental grant programmes cannot be used for the community contribution.

#### Drainage Grant (DR)

- 24. Grant funding of €20 million is being provided in 2022 for drainage measures. The allocation for your local authority is set out in **Appendix 3**. The funding may be used for the alleviation of road drainage problems either through new works or remedial works.
- 25. The works which will be undertaken should be set out in the form Drainage 2022 attached in **Appendix 6** and the completed form should be returned to the Department at RLR@transport.gov.ie by **15th March 2022**.
- 26. The Guidelines for Road Drainage, which outline best practice in relation to road drainage, have been revised and the new Guidelines will be circulated to local authorities shortly. Local authorities should refer to these Guidelines when planning and implementing drainage works.

#### Lower Cost Bridge Rehabilitation (BR)

27. Grant allocations will continue to be provided in 2022 to fund bridge rehabilitation works and your authority's allocation is included in Appendix 3. While it is not necessary for Local Authorities to seek approval to transfer funding among the approved schemes, the Department should be notified of such transfers. Where local authorities wish to introduce a new scheme, for example, if implementation of an approved scheme is delayed, then approval should be sought from the Department.

#### **Lower Cost Safety Scheme (LCS)**

28. The Lower Cost Safety scheme (formerly Safety Improvement Grant) remains in place for 2022 and your authority's allocation is set out in **Appendix 3**. While it is not necessary for Local Authorities to seek approval to transfer funding among the approved schemes, the Department should be notified of such transfers. Where local authorities wish to introduce a new scheme, for example, if implementation of an approved scheme is delayed, then approval should be sought from the Department.

Former National Road Rehabilitation Grant (FN)

29. In light of the 2018 regional road pavement condition survey findings, the Department introduced a grant in 2019 to assist local authorities with the rehabilitation of sections of former national roads with a poor condition rating and this grant is being continued this year.

Following consideration of applications received from local authorities, grants allocations under this heading are included in **Appendix 3**.

#### Climate Change Adaptation & Resilience (CCAR)

- 30. As the impact of climate change on the road network is becoming more apparent, the Department has introduced a Climate Change Adaptation & Resilience Grant. Allocations under this heading in 2022 are in **Appendix 3**.
- 31. Where any changes are proposed to approved CCAR projects, local authorities are required to liaise with the relevant Department Inspector.

#### **Active Travel (AT)**

32. Where funding was allocated under the July 2020 Stimulus Plan Active Travel Grant and projects have not yet been completed, allocations are included in **Appendix 3** to allow local authorities to complete outstanding projects.

#### **Rural Limit Speed Sign**

- 33. With a view to supporting the roll out of the Rural Speed Limit sign as provided for in the Guidelines for Setting and Managing Speed Limits, local authorities were able to apply for funding this year for the deployment of the sign and supplementary plate.
- 34. Where applicable, grant allocations under this grant programme are set out in **Appendix** 3.

#### **Speed Limit Signage in Housing Areas**

35. Local authorities were requested to submit details of proposed expenditure in 2022 on signage related to implementing 30km/h speed limit/slow zone signage programme in housing areas. Where applicable, grant allocations under this grant programme are set out in **Appendix 3**.

#### Cycle "Safe Passing" Signs

36. Following the inclusion in the updated Traffic Signs Manual of a new cycle warning sign which advises motorists of the need to leave adequate space when overtaking cyclists, Circular RST 04/2019 issued to all local authorities on the 19th December 2019.

This Circular included an Advice Note to assist local authorities in determining where the provision of such signs would be most effective. Where applicable, grant allocations for these cycle signs are set out in **Appendix 3**.

#### **PSCI Surveys (PSCI)**

37. A grant to assist local authorities in meeting the network survey requirements set out in Circular RW3/2018 and the Pavement Survey Standard is again being made available this year. Drawdown of this grant is subject to the receipt of a RMO certificate regarding the amount of the required 2022 PSCI survey completed as well as back-up in excel format, from the Agresso/FMS. For this reason, the PSCI allocation included in Appendix 3 will not be put up on the PRS until later in the year.

#### Local improvement Scheme (LIS)

- 38. In the period 2013 to 2018 local authorities were permitted to use a proportion of their initial Discretionary Grant towards local improvement schemes should they wish to do so.
- 39. The Department for Rural and Community Development (DRCD) introduced ring-fenced funding for LIS in 2017 and is continuing to operate this scheme. The option of allocating funding to LIS from the Discretionary Grant will not, therefore, apply in 2022.

#### **Own Resources**

40. The commitment of local authorities to contribute significantly from their own resources towards the cost of improving and maintaining the regional and local roads network is essential. In particular it is vital that local authorities at least maintain and increase, where possible, monies available for the maintenance and strengthening of road pavements.

It may be necessary for local authorities to postpone major widening and realignment schemes to achieve this objective, <u>but the first priority must be the satisfactory protection of the existing road network.</u>

41. It is vital that full consideration is given to utilising the Local Property Tax to boost own resources expenditure on regional and local road maintenance and renewal.

#### **Contingency Provision**

42. Local authorities are advised that the Department is not setting aside contingency monies to address possible severe weather events and that in line with established practice, a contingency provision should be reserved from the overall resources available to each authority for regional and local roads so as to deal with damage caused by severe weather conditions, including flooding.

#### Claims for payment of Grants

- 43. Local authorities should note that claims should continue to be made through Transport Infrastructure Ireland's (TII) Project Reporting System (PRS). These claims will be processed by the Department of Transport. Local authorities should continue to attach general ledger expenditure reports making up the claim on the PRS.
- 44. As part of the claim approval process each local authority has to nominate an official to verify that a claim is in accordance with the requirements for chargeability of expenditure and that all amounts have been checked in full and are in order for payment. The Department would like to emphasise that it considers that this verification is a key part of the financial control system and expects this role to be executed with due diligence and care.
- 45. The Department also wants to emphasise that local authorities are required to submit claims on PRS before 12.30pm on the relevant Friday identified in the pay run schedule and if the claim is not submitted by that time, the Department will not be in a position to process the claim until the following month. Grant allocations only apply for the year in which they are allocated and cannot be carried forward. Any element of a grant allocation which is not claimed and approved for payment under the final pay run of the year is, therefore, lost.

#### **Expenditure Review Requirements**

- 46. The accuracy of all figures submitted by local authorities e.g., grant claims, output data, details of own resources expenditure etc., is of the utmost importance. These figures are used in providing progress reports for Ministers and others. As part of our on-going review of the regional and local roads grant system, it may be necessary from time to time to introduce new requirements to further enhance the control systems in operation between local authorities and this Department.
- 47. You are reminded that this Department can at any time carry out either a full onsite spotcheck or a desk-check on regional and local roads expenditure claimed on PRS.

#### **Weather Warnings**

48. As part of the 2022 allocations Local authorities are again reminded of the need to ensure that the necessary arrangements are in place with Met Eireann to receive weather warnings. In addition, in times of above average rainfall, local authorities should ensure that gullies and drains in high-risk areas are kept clear, to reduce the risk of flooding.

Yours sincerely,

Mary McCullagh

Assistant Principal Officer

Regional & Local Roads Division

15th February 2022

c.c. Each Chief Executive, Senior Engineer

allogh

## Appendix 1

## Grants available in 2022 under Main Grant Headings

Grants being allocated to local authorities under this Circular comprise the following:

Category	Amount € m
Restoration Improvement (RI)	282
Restoration Maintenance (RM)	42
Supplementary Restoration Maintenance (SRM)	33
Discretionary Grant (DG)	84
Drainage Grant	20
Community Involvement Scheme (CIS)	15.2
Lower Cost Bridge Rehabilitation	15.8
Specific Grants	17.7
Grants for Strategic Projects	37.7
Climate Change Adaptation & Resilience	15.2
Active Travel (Carryover)	1.6
Training	2.2
Lower Cost Safety Scheme	10.3
Rehabilitation of Former National Roads	8.6
RLR Signage	1.7
PSCI Survey Support	.75
Miscellaneous (incl. MapRoad, salt reserve)	9.2

## Appendix 2

# Intermediate and Final Completion Dates for Regional and Local Road Works

Operation	Intermediate Completion Dates	Final Completion Date
Surface Dressing (SD)	1/3 by end June 2/3 by end July	31 August
	3/3 by end August	
Road Reconstruction (RR) and Surface Restoration	1/3 by end May	30 September
(SR)	2/3 by end July	
	3/3 by end September	979 / 1
All works other than SD, RR and SR (except schemes	1/3 by end June	31 October
which of their nature must continue into the following	2/3 by end August	
year)	3/3 by end of October	

#### Notes:

- Road Reconstruction involves the regulation or reconstruction of the existing road pavement and overlaying with bound or unbound materials with or without surface dressing and the provision of drainage, where necessary.
- 2. Where work is completed by the various dates, the cost incurred should be reflected in the following months expenditure return.
